

## About Uppsala Cycling Association

Uppsala is a dynamic university city with many cyclists. Despite the makings of a great cycling city there remains ample room for improvement.

Uppsala Cycling Association (Uppsala Cykelförening) was founded in 2006 as an inclusive and nonpartisan organization for all cyclists. We are a motivated group of cyclists who want to get things done.

We both take practical measures for cycling and influence local politics by writing proposals and evaluations of planning documents.

## Our views

- Take cycling at least as seriously as the automobile in urban planning, the built environment, and politics.
- Build a network of cycle thoroughfares in Uppsala: straight, fast, with good visibility, and with right of way over crossing traffic.
- Uppsala should raise its ambitions: instead of today's 33%, at least 60-70% of all journeys in the city could be made by cycle.
- Bike routes should have good signage, safe intersections, and continue through the city (NOT suddenly coming to an end).
- Maintenance and upkeep of cycle infrastructure should be prioritized, particularly snow removal in the winter.
- Secure, weather-protected cycle parking and changing facilities for commuters should be provided at all workplaces.

## Cycle pool

Shopping for groceries, moving furniture, driving the kids (or even grownups)? It's easier than you think with the help of cargo bikes and trailers.

UCF administers a cycle pool with trailers which can carry 50 to 500 kg. Thanks to support from Trafikverket, the pool also includes two- and three-wheeled cargo bikes, some with electric assistance.

Our bikes and trailers (32 in total as of March 2018) are placed with caretakers around Uppsala and can be borrowed by members for a minimal fee.

## Bicycle kitchen

UCF runs a bicycle workshop "Kabyssen" which is open every Tuesday from 5-8 pm except for holidays. You can borrow tools, find spare parts, and learn to do repairs with the help of our instructors.

## Website

At <http://ucf.se/> you can find cycling tips, brochures, upcoming events, and our online booking system for trailers and cargo bikes.
